INFORMATION PACK & CATALOGUE

Nova Chrome UK
Unit 14
Mona Industrial Park
Gwalchmai
Anglesey
LL62 4RJ

Dear Sir/Madam,

Thank you for enquiring about our printing systems.

Please find enclosed our information pack featuring both the equipment and our comprehensive range of on going supplies.

The personalised gift and promotional industry has expanded rapidly during recent years. Latest technology now gives you the opportunity to enter this market and create a large range of unique personalised products, quickly, easily and in full vibrant colour.

So, whether you wish to start an exciting new business or just increase your potential by extending your existing range of supplies, I am sure you will find our systems of great interest.

We think that you will find our brochure quite explanatory but you may have specific questions to ask. Please do not hesitate to contact us and we will be happy to discuss whatever queries you may have. Alternatively, you are welcome to visit our premises, for a full demonstration, with no obligation. All that we require is prior notice so that we can confirm a suitable date.

Yours sincerely,

A handwritten signature in black ink, appearing to read "Ian Howley".

Ian Howley
Sales Director

Sublimation Printing

What is it?

This is often the first question we are asked. We are well aware that for some clients it is a totally new concept, though for others already in the printing industry 'sublimation' may be a familiar term.

Sublimation printing is a procedure for transferring full colour graphics or photographs onto a wide selection of products. These include metal, ceramics, UniSub plastics and products and glass items, all specially pre-coated and, therefore, sublimation receptive. Polyester mousemats and jigsaws plus T-shirts with a polyester content can also be decorated. We regularly research and add new printable products to our range so the scope continually increases.

We have a large client base ranging from the entrepreneur, starting a totally new venture through to established companies keen to expand their product range. Screen printers, embroiderers, corporate gift manufacturers, shop proprietors and more. Because sublimation printing is so versatile and can be easily marketed, it is for some a full time business and for others an addition to their existing business or a supplement to their usual income.

We are happy to answer any specific queries you may have but we have set out below some of the most frequently asked questions.

Do I need a lot of working space?

No. The equipment is quite compact. It can usually be incorporated into your existing business space and we also have clients who operate from home. Others work from a small booth in a shopping mall.

Do I have to produce a large number of items?

No. One of the advantages of sublimation printing is that you can cost effectively produce a one off, a short run or multiples to suit your customer's needs

Will I need to dedicate my printer to sublimation only?

Yes. If you have other printing work to do, with standard inks, then you will need a different printer.

I'm not sure which printer & inks to choose

As official distributors for Sawgrass Technologies dye

sublimation ink, we are able to offer Sublijet-HD for use in specific Sawgrass Virtuoso printers (refer to ink price list). The majority of our customers are working with Sublijet-R or SubliJet-HD, both are renowned for their vibrancy and quality. It has the added advantage of coming complete with Virtuoso Print Manager colour management software for ease of use and consistent printing.

With a choice of inks and a selection of A0, A1, A3 and A4 printers plus the option of 4 through to 8 colour systems there is something to suit everyone. Please feel free to contact us to discuss which printer/ink selection will work best for you. Each business differs so as well as prices we can give you other specifications to enable you to make the right choice to suit your requirements.

What about my PC specifications and what software will I need?

Most PCs, purchased during the last few years, should suffice and we generally use CorelDraw, Illustrator or Adobe PhotoShop software. If you contact us we can discuss what you may already have available to you and what may possibly be required.

I've never done any printing before. Is it difficult?

No. If you are reasonably familiar with using a graphics programme, then you should find the process quick & easy. There are no messy or time consuming preparations and the Heat Transfer Presses are straightforward to use.

What can I produce?

Using the appropriate Heat Transfer Press, you can decorate any of our sublimation receptive items. Personalise mugs, badges, trophies, clocks, T-shirts, mousemats and a wide range of other items in full vibrant colour.

Are profit margins good?

You can, of course, set your own selling price according to the product & quantity. However, because you will be able to offer unique personalised items, tailored exactly to your customers needs, they will, in general, command a higher price and profit margins can be substantial.

STEP INTO THE WORLD OF **SUBLIMATION**

Imagine being able to print, in full vibrant colour, onto a variety of substrates and products. Generating the artwork on your PC and applying it to the end product within minutes. Our sublimation systems enable you to do that, personalising a wide range of goods quickly, easily and cost effectively in five simple steps.

1 Create/Design Your Artwork

Create the design on your PC or MAC using a standard graphics programme, for example, Adobe Photoshop, CorelDraw or Illustrator are all fine to work with, or Sawgrass' own Creative Studio. Use our product templates for fast accurate sizing and shaping. Photos or logos can be scanned and for extra scope you may want to add a digital camera to the system.

2 Send Your Artwork To Print

Print your artwork from your chosen Dye Sub printer which is loaded with sublimation inks. We supply these inks in various forms, with a choice of Printers ranging from A4 to A0. For optimum results, it is important to select a printer and inks suitable for your needs and we are happy to discuss the available options.

3 Prepare Your Product

In general, the artwork is printed in mirror image onto dye sublimation transfer paper. The print is placed on to the sublimation receptive item and secured in place with heat resistant tape. We offer a large selection of printable products to suit your customers needs.

4 Transfer Your Artwork To The Product

Choose from our range of high quality Ultra-Deep Swing-head Presses to print onto flat products. The comprehensive range of flat sublimatable substrates includes plastic, metal, slates, glass, wall mount photo panels, jigsaws and much more.

The item is positioned in the appropriate Heat Transfer Press and heat and pressure are applied for the recommended short time. Our full wrap Mug Press can print from top to bottom of the mug in approx 2½ minutes.

5 Your Finished Product

Remove the paper (taking care as the item is hot) and the process is complete. No mess, no fuss, no costly or time-consuming set-ups. Sublimation is simple, fast and versatile. Produce a 'one-off' or larger quantities. Just print and press to create a variety of unique, personalised items!

EQUIPMENT

HEAT PRESSES

3083

3083 A4+ Swing Head Press

- Swing-head operation allowing accurate & easy application, together with safety of operation
- Pressure adjustment by control wheel, suitable for both light and heavy pressure requirements
- Working temperature range of 0°C - 200°C
- Designed for our range of deeper products, such as acrylic products and wall mounts - accommodates up to 30mm depth
- Platen / Bed size of 29 x 38cm
- Volts: 220AC Fuses: 13A Watts: 1.2kW

3051 A3+ Ultra Deep Heat Press

- Swing-head operation allowing accurate & easy application, together with safety of operation
- Interchangeable beds for pressing unusual shaped items
- Pressure adjustment by control wheel, suitable for both light and heavy pressure requirements
- Spacious 38cm x 50cm (15" x 20") print area
- Accommodates items up to 60mm in depth
- Volts: 220AC Fuses: 13A Watts: 1.8kW

3051

3050 A2 Swing-Head Deep Impact Press

- Swing-head operation allowing accurate & easy application, together with safety of operation
- Interchangeable beds for pressing unusual shaped items
- Pressure adjustment by control wheel, suitable for both light and heavy pressure requirements
- Spacious 45cm x 60cm (18" x 24") print area
- Accommodates items up to 60mm in depth
- Volts: 220AC Fuses: 13A Watts: 2.2kW

3050

3085 A1 Pneumatic Heat Press

- Perfect for medium to high volume production with low operator fatigue
- Automatic sliding table for ease of loading
- Suitable for pressing all of our flat products including deeper items such as Wall Mounts & Acrylics
- Bed size of 105 x 75cm
- Volts: 220AC Watts: 10.4kW
- An Air compressor is needed to use this press.
- A stand for this press is available at an additional cost.

EQUIPMENT

MUG, CAP & CRAFT PRESSES

3081 Two Element Multi Function Mug Press

- Supplied with two heating elements
- Suitable for pressing **sixteen** different styles of mugs and products, including the Durham, Windsor (bone china) and Sparta mugs
- Slip in, slip out element design for ease of replacement
- Compact, lightweight design
- Not suitable for our range of Latte Mugs

3082

3082 Four Element Multi Function Mug Press

- Supplied with four heating elements
- Suitable for pressing **twenty** different styles of mugs and products, including the Durham, Windsor (bone china) and Sparta mugs - will also accommodate 12oz / 17oz Latte mugs with the supplied elements
- Slip in, slip out element design for ease of replacement
- Compact, lightweight design

Mug Press Elements

- Select from either the Durham (3070), Bone China (3071), 12oz Latte (3057) and 17oz Latte (3058) elements. Each sold separately. Latte Elements are special order, please contact us for further information.
- Add on the Bottle Element (3064) for a larger print on our range of bottles. Can only be used with our Four Element Mug Press only.
- Slip in, slip out element design for ease of replacement
- For use with our Multi Function Mug Presses Only.

3055

3055 Cap Heat Press

- Supplied with one Heating Pad (fixed)
- Heating Pad measures approximately 8.5 x 14cm
- Suitable for pressing our range of **Children's & Adults Caps with Visors**
- Compact, lightweight design

3053
3054

Craft Express Craft Heat Presses

- Supplied with one Heating Pillow for Craft Press.
- Heating Pad measures approximately 17.8 x 20.3cm / 25 x 30.5cm.
- Suitable for pressing our range of smaller printable items, including, coasters, keyrings, t-shirts and more.
- Compact, lightweight design - suitable for space saving, or situations where larger presses are unsuitable.

ISMART OVEN (40ltr)

Capacity	40ltr
Appearance	Blue Outer Casing, Double Layered Glass Door
Size	46 x 47 x 38cm (W:D:H)
Voltage	AC220V 50Hz
Power	1600W+400W (2000W)
Temp. Range	60 - 230c

The **iSmart Oven** enables production of items such as Pet Bowls, Enamel Tins and other items that have previously been a challenge to produce with mug & flat bed heat presses.

The preparation process is easy - apply your sublimation print to the product, pick the appropriate sized film and gently heat using the supplied head gun to shrink around the product. This helps keep the paper in full contact with the surface of the product, eliminating the need for a traditional clamp. Place your product(s) in the **iSmart Oven**, set the desired time and temperature, and in a few minutes your product is ready. Remove and allow to cool before peeling away the film, and you're done!

Below are some products & consumables for use with the **iSmart Oven**.

3107

3107 - Ceramic Dog Bowl
Measuring approx 18cm diameter.

3108

3108 - Ceramic Cat Bowl
Measuring approx 15.4cm diam.

3635 /
3636

3635/3636 - Enamel Bowls
40oz. Tall and Shallow available

3061

3061 - Heat Gun
Sold individually

Shrink Films
Sold in packs of 10

3770	Shrink Film - 33.5 x 15cm
3771	Shrink Film - 15 x 23.5cm
3772	Shrink Film - 33 x 11cm
3773	Shrink Film - 12 x 17.5cm

EQUIPMENT

Introducing the **OTTER M30** DTF PRINTER

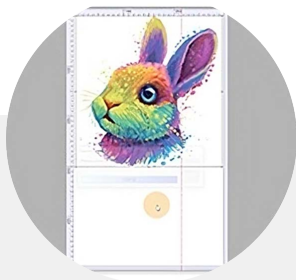

For those unfamiliar with the term, DTF (or Direct to Film) is a process for producing transfers that can be applied to the broadest possible range of fabrics available. The scope here is enormous – everyday garments can be decorated, but so too can heavy duty workwear, as well as lightweight sports and performance wear.

The process offers simple production of transfers with no weeding or production of masks, but delivering long lasting results that stretch and wash in a way that compare to screen printing or sublimation. Transfers are printed on to film, with the colour being laid down, and covered with a base of white ink. This printed film is then covered with a translucent 'hot melt powder', which is then cured by heat (typically oven or heat press) at around 120°C for 3 minutes. The result is a very thin, incredibly stretchy transfer that can be applied with a firm pressure at a very short time of just 20 seconds.

This solution offers a compelling package – low startup costs, a compact desktop form factor and the flexibility to produce one off and short run DTF transfers. Capable of printing roll or sheet fed media up to 30cm width, this compact system also offers in-built white recirculation to assist with maintenance. This makes it perfect for those who want to avoid the additional costs, minimum order quantities and turn-around times of outsourced production.

DTF - Process Overview

1. Design your image.

2. Print on DTF Film.

3. Cover image with Powder.

4. Cure the transfer using heat press or iSmart oven.

5. Press on garment at 150°C / 20 seconds, using a firm pressure.

6. Wait until cool, and peel the film to reveal the transfer.

7. Enjoy the soft hand and long lasting results!

DURHAM SUBLIMATION MUG

3133

The **Durham** sublimation mug is arguably the most popular mug available for dye sublimation printing, being one of the very first styles available. Our Durham mugs offer fantastic print quality and top-to-bottom imaging (when used with an appropriate mug press) - with consistent results, batch after batch.

Our **10oz Durham (3133)** and 11oz Durham (3104) mugs can be printed top to bottom with one of our mug presses (3081 & 3082).

These are supplied from in boxes of 36, and are available in two other variations - Coloured Inner & Handle (Choose from Blue, Red, Black, Yellow, & Pink) and the Colour Change Mug (available in Black).

3103
